Binghamton university map pdf

To get university students to Banghamtown, as you make your weekend plans, remember that The Banghamtown City and Branch Ome County areas are still experiencing very high infection rates. The current 7-day average for Branch Ome County is 3.7 lbs and the 7-day average for The University of Banghamtown is 0.37 lbs. So, going into the community could increase the chance of being affected by COVID-19 by an element of approximately 10! So, as you make your plans, if you don't have to go to the place at all, don't go! Keep wearing face masks, social distances and avoiding large gatherings. These processes work in keeping down positive numbers. It's time to be careful. Thank you for your contribution to our university community and for your commitment to creating a safe Banghamtown University. I wish you a safe and useful end to the semester! We can do this at the same time. The Creator, Harvey G. Ster President To get university students to Banghamtown, as you make your weekend plans, remember that The Banghamtown City and Branch Ome County areas are still experiencing very high infection rates.
